

Updates

Construction continues on the expansion project and we believe we will have some major activity beginning next week. The framing of the building will begin and members should begin to notice some major visible changes on the job site. Additionally the interior office work is nearing completion, so we are looking forward to being able to take down the black plastic sheeting inside the Fitness Center.

As expected, the use of the Fitness Center has really picked up to start the New Year. With the construction going on, the limited space and one unusable exit in the Fitness Room, we really need to pay close attention to the number of members using the room. We want to be sure that our members have a safe environment to work out in. With this being said, we would encourage members to use the alternate equipment in the hallways. We would also encourage anyone that has the flexibility in their schedule to avoid the busy evening hours between 6pm and 9pm Monday through Thursday. We appreciate your patience as we continue to work on expanding the Fitness Center for you.

What to Expect

Next Week:

- Minor interior work will continue on the southeast corner of the Fitness Center, behind the black plastic.
- Framing of the addition will begin.

Near Future:

- The expected timeframe for some of the major relocation of equipment has moved to mid-February. At this time we also expect to have the relocation of interior doors and entryway upgrades complete.

Impacts to Members

With the construction of the expansion's frame we anticipate that there will be some additional noise coming from the exterior of the building. Additionally, as work on the interior office moves towards completion we may have some interior noise as well as some of the construction workers entering and exiting through the Fitness Center.

In addition to the parking lot space used for the construction site 6 to 10 additional parking lot spaces will be used to store the steel roof trusses for a couple weeks until they are moved into place.

Tell Us What You Think

While we anticipate some impacts during construction, the staff at the CRC is committed to mitigating these impacts as much as possible. Let us know how we are doing, by filling out a comment card, talking to our staff, or emailing us at chris.ghione@mhcrc.com. We really feel the final project will be "worth the weight".
